Homework 07

Provide the following:

Deliverable for Task 1: Take a screenshot of all the GPOs created for this homework assignment. To find these, launch the Group Policy Management tool, select **Group Policy Objects**, and take a screenshot of the GPOs you've created.

Name	GPO Status	WMI Filter	Modified	Owner
Account Lockout	Enabled	None	10/26/2020 7:0...	Domain Admi...
Default Domain Controller...	Enabled	None	9/22/2020 1:37:...	Domain Admi...
Default Domain Policy	Enabled	None	9/22/2020 2:03:...	Domain Admi...
Limit Settings	Enabled	None	10/21/2020 9:0...	Domain Admi...
No Control Panel	Enabled	None	10/21/2020 8:1...	Domain Admi...
No LLMNR	Enabled	None	10/26/2020 6:4...	Domain Admi...
PowerShell Logging	Enabled	None	10/26/2020 7:1...	Domain Admi...

Deliverable for Task 2: Submit a screenshot of the different `Account Lockout` policies in Group Policy Management Editor. It should show the three values you set under the Policy and Policy Setting columns.

Policy	Policy Setting
Account lockout duration	5 minutes
Account lockout threshold	10 invalid logon attempts
Reset account lockout counter after	5 minutes

Deliverable for Task 3: Submit a screenshot of the different `Windows PowerShell` policies within the Group Policy Management Editor. Four of these should be enabled.

Setting	State	Comment
Turn on Module Logging	Enabled	No
Turn on PowerShell Script Block Logging	Enabled	No
Turn on Script Execution	Enabled	No
Turn on PowerShell Transcription	Enabled	No
Set the default source path for Update-Help	Not configured	No

Deliverable for Task 4: Submit a copy of your `enum_acls.ps1` script.

```
1    # enumerates the ACL status of each file/directory in the current directory
2
3    $directory = ls;
4    foreach($item in $directory) { Get-Acl $item }
5
```
